"I build production-grade AI systems — RAG pipelines, LLM-powered APIs, and multi-agent workflows."

PORTFOLIO REFERENCE NOTES

Compiled: May 2026

01 | PROFESSIONAL SUMMARY

Thirupathi Burra is a final-year Computer Engineering student at Matrusri Engineering College (graduating 2026), based in Hyderabad, India. He specialises in building **production-grade AI systems** including RAG pipelines, LLM-powered APIs, multi-agent workflows, and generative UI experiences. He is actively recognized in the Indian and global AI community — as a **Google Cloud GenAI Exchange top learner**, a **Google Agentathon finalist**, a **Smart India Hackathon (SIH) finalist**, and a participant in the **AI Tinkerers Global Hackathon** (Hyderabad, May 2026).

He is open to paid remote internships, freelance AI projects, and part-time roles. His work spans academic research (published in IJESAT), open-source contribution (GSSoC 2026), and real-world deployments via internships at Infosys Springboard and Edunet Foundation.

03 | EDUCATION

Bachelor of Computer Engineering

Matrusri Engineering College, Hyderabad | 2022 – 2026 (Expected)

- Final-year student specialising in AI, Machine Learning, and Software Engineering.
- Built multiple production-level AI projects during the degree.
- Research published in the International Journal of Engineering Science & Advanced Technology (IJESAT).

04 | WORK EXPERIENCE

Artificial Intelligence Intern

Infosys Springboard | August 2025 – October 2025 (3 months)

- Built an AI KYC Pipeline using OCR + Machine Learning for fraud detection.
- Worked on document parsing, semantic search, and agentic validation workflows.
- Applied Python, FastAPI, and vector databases to build scalable backend services.
- Gained hands-on experience in production AI system design within an enterprise context.

Artificial Intelligence & Cloud Intern

Edunet Foundation | June 2025 – July 2025 (2 months)

- Worked at the intersection of AI and Cloud technologies.
- Built and deployed AI-powered applications on cloud infrastructure.
- Strengthened skills in LLMs, cloud APIs, and scalable ML system design.

05 | KEY PROJECTS

UIVerse — AI-Native Runtime Workspace Generator

Built at AI Tinkerers Global Hackathon, Hyderabad | May 9, 2026

- The project concept: the agent becomes the frontend. Users type a prompt (e.g. 'Create a logistics operations workspace') and AI agents dynamically generate charts, KPI cards, workflows, and forms in real time.
- Built a multi-agent CrewAI backend with 4 specialised agents: UI Agent, Analytics Agent, Workflow Agent, and Data Agent.
- Integrated CopilotKit AG-UI runtime to enable live UI mutation — the interface evolves in real time as users modify prompts.
- Used Gemini 2.5 Flash for reasoning and JSON-schema generation; Groq for fast streaming responses.
- Implemented a dynamic React renderer with switch-based component dispatch (chart, card, table, workflow panel, form).
- Built an Agent Activity Panel providing visual, cinematic multi-agent collaboration visibility to end users.
- Positioned as: 'A multi-agent runtime interface engine where AI agents dynamically generate and evolve software interfaces in real time.'
- Submitted to the global hackathon portal (results announced May 15, 2026). Event presented by AI Tinkerers, Google DeepMind, and CopilotKit across 18 cities on 4 continents.

React	Vite	TailwindCSS	CopilotKit	CrewAI	FastAPI
LangChain	Gemini 2.5 Flash	Groq	Zustand	Framer Motion	Recharts

AuditIQ — Autonomous Multi-Agent Compliance Auditor

Built at Google Agentathon (36-hour hackathon) | Finalist

- An autonomous AI system for compliance auditing using multi-agent orchestration.
- Document parsing + OCR + semantic search for robust context extraction from financial and legal documents.
- Rule-based checks combined with agentic workflows for complex multi-step compliance validations.
- Produces an audit trail with full citations for traceability and compliance defence.
- Team: Thirupathi Burra, Shiva Kumar Karanam, Saketh Reddy Varkuti, RITVIK Reddy.

CrewAI	LangChain	NVIDIA NeMo Retriever OCR	PyMuPDF	Python	FastAPI
Pinecone	React	Vite	TailwindCSS		

FinSmartAI — Document Q&A; + Market Sentiment + Expense AI

Research Published in IJESAT (International Journal of Engineering Science & Advanced Technology)

- Production-grade financial AI system combining three capabilities: document Q&A;, market sentiment analysis, and expense AI.
- Implements a full RAG (Retrieval-Augmented Generation) pipeline for document question-answering.
- Market sentiment module analyses financial news and market signals using LLMs.
- Research findings published in IJESAT — demonstrating academic-level contribution beyond just project work.

Python	LangChain	RAG	LLMs	Vector DBs	Flask
FastAPI					

AI KYC Pipeline — OCR + ML Fraud Detection

Infosys Springboard Internship Project | August – October 2025

- Built an end-to-end Know Your Customer (KYC) pipeline using OCR for document extraction and ML models for fraud detection.
- Integrated semantic search for document context retrieval and validation.
- Designed for enterprise-scale compliance and financial fraud prevention.

Python	OCR	Machine Learning	FastAPI	Vector DBs	Docker
--------	-----	------------------	---------	------------	--------

Personalized Career & Skills Advisor (GenAI Exchange Hackathon)

Google Cloud GenAI Exchange Hackathon 2025 | Top Learner

- Designed a GenAI-driven recommendation system for career and skill guidance.
- Focused on personalisation, prompt design, and AI reasoning for mapping user profiles to skill gaps and career pathways.
- Emphasised practical applicability, scalability, and real-world use cases.
- Team: Thirupathi Burra, Shiva Kumar Karanam, Saketh Reddy Varkuti, Harshith Kumar.

06 | HACKATHONS, COMPETITIONS & EVENTS

AI Tinkerers Global Hackathon — Generative UI (Hyderabad)

May 9, 2026 | Participant — Built UIVerse

- One of 18 simultaneous global hackathon cities. Presented by AI Tinkerers, Google DeepMind, and CopilotKit.
- 6-hour build session. Challenge: build AI agents that render complete, interactive interfaces at runtime.
- Built UIVerse — a multi-agent runtime workspace generator using CopilotKit + CrewAI.
- Stack used: A2UI (Google), AG-UI (CopilotKit), MCP Apps. Global results announced May 15, 2026.

Google Agentathon

2025 | Finalist

- 36-hour agentic AI hackathon organised by Google.
- Built AuditIQ — an autonomous multi-agent compliance auditor.
- Reached the finalist round, demonstrating strong multi-agent system design and rapid prototyping.

Google Cloud GenAI Exchange Hackathon

2025 | Top Learner & Participant

- National AI innovation platform powered by Hack2skill.
- Built a Personalized Career & Skills Advisor using Gemini and GenAI techniques.
- Recognised as a Top Learner in the Google Cloud GenAI Exchange program.

Smart India Hackathon (SIH)

2025 | Finalist

- India's largest national-level hackathon, organised by the Government of India.
- Reached the SIH finals, competing against top engineering students from across India.

GSSoC 2026 — GirlScript Summer of Code

2026 | Open Source Contributor

- Contributing to open-source AI/ML projects as part of GSSoC 2026.
- Engaged with the broader developer community through open-source collaboration.

ISRO SpaceTech Innovation Event

2024–2025 | Participant

- Participated in an ISRO-related space technology and innovation event.
- Explored the intersection of AI, data science, and space applications.

07 | TECHNICAL SKILLS

Languages & Frameworks

Python	SQL	JavaScript	React	Flask	FastAPI
--------	-----	------------	-------	-------	---------

AI / ML

LangChain	CrewAI	RAG	LLMs	PyTorch	Scikit-learn
-----------	--------	-----	------	---------	--------------

Recharts					

08 | CERTIFICATIONS & TRAINING

Nestle Certificate

Corporate learning / professional development certification from Nestle.

AI Tools Workshop

Hands-on workshop on AI tools and practical applications.

Industrial Training Certificate

Certification from industrial training programme — reinforcing applied engineering skills.

Certificate of Participation

Multiple participation certificates from hackathons, boot camps, and AI events.

Certificate of Completion

Completion certificates from online courses and structured learning programmes.

09 | LINKEDIN ACTIVITY & POSTS SUMMARY

The following summarises Thirupathi's public LinkedIn posts, reflecting his personal brand, areas of focus, and community engagement:

Google Cloud & GenAI Exchange Top Learner

Post sharing his recognition as a top learner in the Google Cloud GenAI Exchange programme. Hashtags: #GoogleCloud #BuildWithAI — aligns with his deep Google Cloud and GenAI stack work.

GSSoC 2026 — Open Source Contribution

Post announcing participation in GirlScript Summer of Code 2026 as an open-source AI contributor. Demonstrates commitment to community and collaborative development. Hashtags: #GSSoC2026 #OpenSource #AI.

General AI / GenAI / Machine Learning

Thought leadership post on Artificial Intelligence, Generative AI, and Machine Learning trends. Reflects active personal brand building in the AI space. Hashtags: #ArtificialIntelligence #GenerativeAI #MachineLearning.

AuditIQ & FinTech / Autonomous Agents

Post about AuditIQ — the autonomous multi-agent compliance auditor built at the Google Agentathon. Highlights multi-agent AI for fintech and compliance. Hashtags: #AI #FinTech #AutonomousAgents.

GenAI Exchange Hackathon 2025

Post documenting participation in the Google Cloud GenAI Exchange Hackathon powered by Hack2skill. Covers the career advisor project, team collaboration, and key learnings. Hashtags: #GenAIExchange #GoogleCloud #Hack2skill.

ISRO SpaceTech & Innovation

Post related to ISRO (Indian Space Research Organisation) space technology event participation. Reflects broad interest in innovation beyond conventional AI/software domains. Hashtags: #ISRO #SpaceTech #Innovation.

10 | PERSONAL BRAND & PORTFOLIO POSITIONING

Core Identity Statement (for portfolio headline)

I build production-grade AI systems — RAG pipelines, LLM-powered APIs, and multi-agent workflows.

Final-year Computer Engineering student | AI/ML Builder | GenAI & Agentic Systems | Published Researcher | Hackathon Finalist

Differentiators (what makes you stand out)

1. Published research in IJESAT — academic credibility on top of practical work.
2. Google Agentathon Finalist + SIH Finalist — proven competitive AI builder.
3. AI Tinkerers Global Hackathon participant — part of an elite global builder community.
4. Google Cloud GenAI Exchange Top Learner — recognised by Google.
5. Two internships (Infosys Springboard + Edunet Foundation) — real-world production experience.
6. Open-source contributor via GSSoC 2026 — community engagement and public code.

Recommended Portfolio Sections

- Hero: Name + Tagline + CTA (email / GitHub / LinkedIn)
- About: Summary paragraph + key stats (2 internships, 5+ projects, 2 finals, 1 publication)
- Projects: UIVerse, AuditIQ, FinSmartAI, AI KYC Pipeline, GenAI Career Advisor
- Experience: Infosys Springboard + Edunet Foundation
- Hackathons & Events: Timeline or badge-grid format
- Skills: Grouped tag display (Languages, AI/ML, GenAI, Cloud, Frontend)
- Certifications: Card grid
- Blog/Posts: LinkedIn posts embedded or linked
- Contact: Email + GitHub + LinkedIn + Kaggle

11 | AT-A-GLANCE STATS FOR PORTFOLIO

5+ Projects Built	2 Internships	2 Hackathon Finals
1 Published Paper	18-City Global Hackathon	Top GenAI Learner

This document was compiled from Thirupathi Burra's LinkedIn profile, LinkedIn posts, hackathon records, and project documentation — to serve as a comprehensive reference for building his personal portfolio website.
